

IILM UNIVERSITY

Data Science Master Virtual Internship

Internship Report

Student Name

Vibhu Maurya

Enrollment Number

2410031414

Program & Semester

B.Tech (CSE) - IBM, 5th Semester

Organization

AICTE-EduSkills Virtual Internship
Supported by Siemens

Introduction

The Data Science Master Virtual Internship provided an opportunity to gain structured exposure to the field of Data Science through a virtual internship experience.

The internship was undertaken at IILM University, Greater Noida, as part of the AICTE–EduSkills Virtual Internship Program, with support from Siemens.

The internship was completed over a period of 8 weeks during April–June 2026.

Purpose of the Internship

The primary purpose was to strengthen understanding of Data Science and data-driven problem solving, while gaining practical exposure beyond regular classroom learning.

8 Weeks

April – June 2026

Internship Overview

The internship focused on developing a broader understanding of the Data Science domain and its relevance in solving real-world problems.

INTERNSHIP

**Data Science Master
Virtual Internship**

DURATION

8 Weeks

PERIOD

April – June 2026

INSTITUTION

**IILM University,
Greater Noida**

PROGRAM

**AICTE–EduSkills
Virtual Internship**

SUPPORTING ORGANIZATION

Siemens

Overall Focus

The internship contributed to developing a data-driven approach to problem solving and provided an opportunity to connect academic knowledge with practical learning.

Learning & Certification Journey

The Data Science internship was complemented by three certifications completed through Cisco Networking Academy and IILM University, creating a progression from understanding AI to applying it and developing knowledge of Data Analytics.

These three certificates were offered by IILM University through the Cisco Networking Academy program.

Skills & Knowledge Gained

The internship and certifications helped develop a foundation across Artificial Intelligence, Data Analytics, and Data Science.

Artificial Intelligence

Developed an introductory understanding of modern AI and its practical applications.

Data Analytics

Gained a foundation for understanding the importance of data and using analytical thinking to derive meaningful information.

Data Science

Developed exposure to the Data Science domain and its role in data-driven problem solving.

Analytical Thinking

Improved the ability to approach problems by considering data, information, and practical applications.

Key Outcomes

The internship and additional certifications provided valuable exposure to the relationship between Artificial Intelligence, Data Analytics, and Data Science.

1 Developed a stronger foundation in AI and Data Science.

2 Improved understanding of data-driven problem solving.

3 Gained exposure to the practical application of AI through customer review analysis.

4 Developed greater awareness of the role of data and analytics in decision-making.

5 Connected certification-based learning with an internship experience.

6 Established a foundation for pursuing more advanced projects in AI and Data Science.

Learn

Understand

Apply

Develop

Conclusion

The Data Science Master Virtual Internship, supported by my Cisco Networking Academy certifications, provided a structured learning journey across Artificial Intelligence, Data Analytics, and Data Science.

The experience helped me strengthen my conceptual foundation, develop analytical thinking, and understand how data-driven technologies can be applied to practical problems.

Future Direction

Moving forward, I aim to build on this foundation through practical projects, real-world datasets, and advanced learning in AI and Data Science.

Thank You
